

Article 2, April 2021

The Village of Point Venture is nationally recognized Firewise Community. This designation must be renewed annually. What does that mean to you, a resident of Point Venture?

Firewise is a community based initiative to reduce fire risk within a community. This starts with each of our properties. A community pulling together becomes a safer place for all residents.

In prioritizing hazardous risks for Point Venture, Fire is number one. We, the residents have the power to mitigate this risk with individual and community actions.

Texas A&M Forest Service has provided useful documents to help us begin the mitigation process. Carl Schwope, FWS Fire Management Office, and Alexander Bregenzer, Texas A&M Forest Service, Wildland-Urban Interface Coordinator, provided this information at a webinar by the Friends of Balcones.
